

GEO 426/595 - Lab 5
Universally Understood: UML Design

Due November 5, 2003

1. Write a short report (4-6 pages including diagrams) defining the entities, relationships, and properties for one of the following information systems:
 - a) An University Library
 - b) A Registry of Deeds
 - c) A County Park Management System
 - d) OR a system of your choosing
2. Provide a set of UML class diagrams for the system you chose to define.
3. Team work is **STRONGLY** encouraged.
